Life Cycles

A life cycle is a series of changes a living thing goes through. It starts at the beginning of their life and follows through to the end. Different animals go through different life cycles.

Continents

Lots of big pieces of land join up to make our world. These are called **continents**.

South America
North America
Asia
Australasia

Africa
Europe
Antarctica

Key Vocabulary

Countries	Compass
Continents	Climate
Polar	Tropic
Hemispheres	Equator

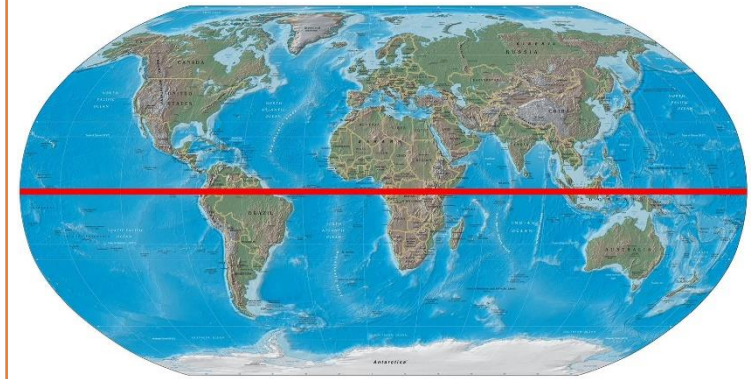

Oceans

There are five oceans in the world:
Pacific Ocean,
Atlantic Ocean,
Indian Ocean,
Southern Ocean and
Arctic Ocean.

Equator

The Equator is an imaginary line around the middle of Earth. It is halfway between the **North** and **South Poles** and divides Earth into the **Northern and Southern Hemispheres**.
